

Secure Web Browsing for Interactive, Touch-Screen Kiosks

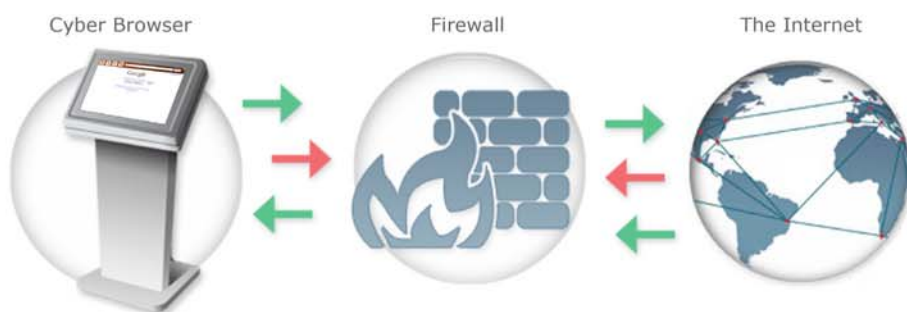

Do you need a low-cost, flexible, secure software solution for your kiosks?

Would you like to be able to control every aspect of the kiosk user experience?

How about some simple options to upgrade the software or add remote monitoring?

Powering unattended, touch-screen kiosks worldwide since 2001. CyberBrowser is compatible with all kinds of kiosk touch-screens and peripheral devices such as printers and scanners.

Unlike many competing solutions CyberBrowser was created as a secure browser specifically with kiosks in mind. It forms part of an extensive product range that offers all you will ever need from secure web browsing, content management, security and remote monitoring.

Benefits

- **Impenetrable security.** Enjoy peace of mind in the knowledge that all of your kiosks have the CyberSentinel watchdog, ensuring no unwanted access or manipulation.
- **Selectable themes** and browser skins alter the 'look and feel' of your kiosk. Change colours, button sizes etc. and show or hide a virtual keyboard.
- **Configurable browsing** experience. Limit internet or intranet access to specific URLs such as your company website or a Facebook login page.
- **Digital Signage integration.** Insert your own 'attractor' page so that when the kiosk is not in use, the screen shows useful information and invites interaction (full digital signage upgrade is available).
- **Custom development.** As an established website developer and design studio with over 10 years of experience, we can offer an extensive range of services, from simple template creation to end-to-end project management,
- **Kiosk monitoring** and remote site management. Add the 'Kiosk Monitor Watchdog' solution and benefit from the most powerful kiosk network management system available today!

CyberBrowser Features

- Many different browser skins to suit your corporate identity
- On-screen keyboards that can be shown or hidden when needed
- Attraction mode can be used as an advertisement or a pull-in for users
- Surfing permissions, or 'white listing' and 'black listing'
- Google search to make web browsing easier and faster
- Download management restricts or prohibits the download of files
- Printing is easily enabled or disabled, or paperless via Bluetooth
- Logout security enables users to terminate their session manually
- Pop-up blocker suppresses just the pop-ups you don't want to see
- Full screen mode provides a plain and simple browsing experience

Kiosk Software Applications

As an experienced developer of custom software solutions for digital signage and kiosk applications, we are ideally positioned to understand our clients' needs and to advise them each step of the way towards a successful solution.
